

# Piercing Healing Times

Please be aware that the healing times below are approximate and based on the average healing times for most clients. The healing rate of your piercing can be influenced by various factors, so there is no cause for concern if your piercing is healing more slowly than mentioned below.

- Ear Lobe – 3 months
- Cartilage such as Tragus, Conch, Helix, Rook etc – 3 to 6 Months but can take much longer. Daith, Industrial, will take longer and you could be looking 9 months+

If your cartilage piercing takes over 6 months to heal please book a consultation appointment for a check up.

- Navel – 6 Months
- Nipple – 3-6 Months
- Eyebrow – 2-3 months
- Bridge – 4-6 months
- Septum – 2-3 months
- Nostril – 3-6 months
  
- Surface Piercings – 6 to 9 months but can be 12 months+
- Microdermals – 3 months+
  
- Tongue – 3 months to fully heal (downsized after 2 weeks for the best healing)
- Lip / Labret All placements – 3 months+
- Vertical or Horizontal Lip – 3 months+
  
- Prince Albert – 3 months
- Reverse Prince Albert – commonly around 3 to 6 months
- Ampallang & Apadravya – 6 months+
- Frenum – Up to 6 months+
- Guiche – 2-3 months
- Scrotum / Hafada – 2-3 months
- Clitoral Hood – 2 – 6 weeks
- Inner Labia – 4-6 weeks
- Outer Labia – 2-3 months
- Christina – 6 months+
